

Introducing our **latest** innovation

Designed and crafted with precision in-house engineering at Holroyd, the HX3 system is Australian owned and certified for quality assurance. This package boasts an enhanced carry capacity.

Featuring a robust 63mm square stub axle forged from premium Australian steel. Coupled with XT backing plates and off-road brake magnets to ensure exceptional durability and braking performance. Backing plate fitted with convenient quick connections.

Our 3T hub is meticulously machined engineered to outlast our competitors, run cooler and weigh less. Designed to effortlessly navigate both on-road and off-road conditions, it's the epitome of safety, reliability, and performance.

HX3
